

# 3M™ Fully Automatic Water Softener Range

SFT 200

SFT 200Fe

### Install and Forget

With the auto regeneration feature, our water softeners bring to you maximum quality with minimum intervention.

### Complete Control

NSF listed, best-in-class control valve with user-friendly display to give real-time diagnostics and usage information.

### Reliable Resin

High efficiency and high performance food grade resin to give you soft water.

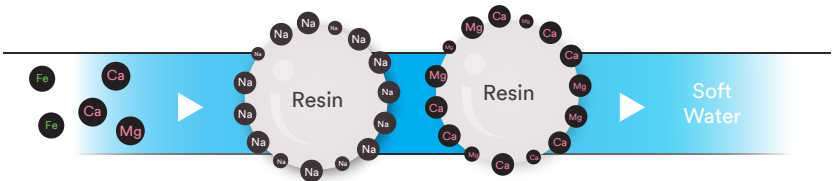

### Inspiring Design

Unique arc barrel design, equipped with a damping cover for ease of access and a premium experience.

## Ion Exchange Technology

The high efficiency softening resin removes Calcium, Magnesium and Iron ions (specific to SFT 200Fe), replacing them with Sodium ions - hence treating your water for hardness as well as iron build-up.

## Introducing SFT 200Fe

### With Unique Resin Technology

SFT 200Fe exhibits all the functions of SFT 200 and more. It softens the hard water in your home with an advanced softening resin and goes one step further by reducing the excess iron content in water.

### Advanced Usability

Suitable for usage in high hardness levels of up to 2000ppm.\*

### Enhanced Function

Removes Iron (up to 3ppm) in addition to Calcium and Magnesium ions and prevents resin fouling from heavy metals.

### Reduced Salt & Water Consumption\*

Reduces salt consumed per regeneration up to 30% and saves up to 20% water through optimal regeneration frequency.

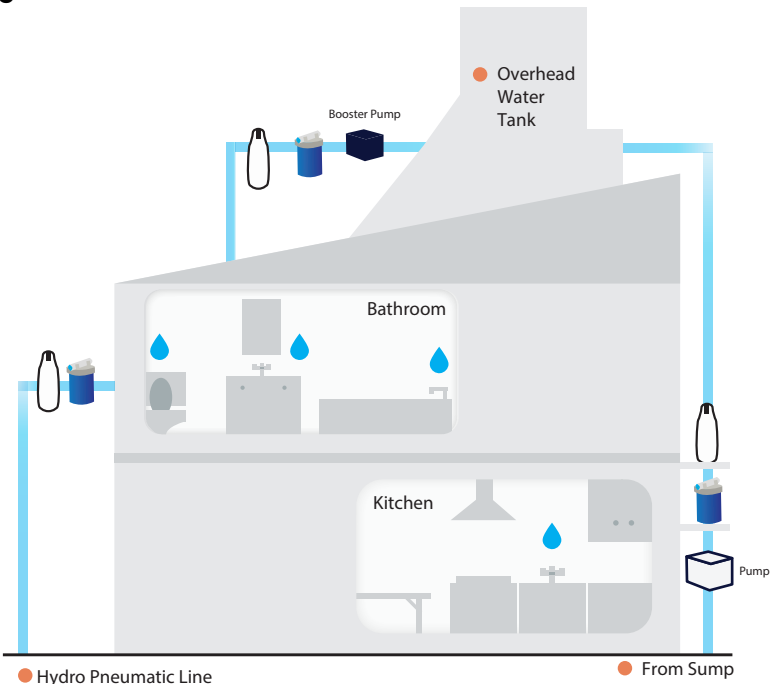

\*Tested under lab conditions. Results may vary as per actual site conditions.

## Advantages of Soft Water

- Shiny tiles and washroom fittings
- Soft and bright fabric
- Prolonged life of appliances and pipes
- Reduced electricity consumption
- Soft skin and shiny hair
- Spot free car wash

## Installation

Soften the water in your house, right at the source.

# The harm in hard water!

Clogs your pipes and shiny fixtures with ugly deposits.

Roughens your hair, making it frizzy, leading to hair-fall.

Leaves your skin dry, and causes irritation.

## How does excess iron in your water affect you?

Leaves dark stains on appliances, washroom fixtures and clothes.

Clogs pipes with iron residue, leading to reduced water pressure.

Adds an unpleasant taste to your water.
